EXPERIENCE:

RumbApp, Full-Stack Software Engineer   Oct 2023 - Current

RumbApp is a platform that allows users to discover local bars, clubs, and discos in a geographic location. It also allows bars and club owners to offer their services online to create a more seamless experience.

- Integrated third-party APIs, including Stripe, enabling vendors to create accounts and users to seamlessly checkout while purchasing products or services.
- Designed and implemented secure RESTful APIs, ensuring smooth communication between the front-end and back-end systems.
- Validated and optimized API endpoints using POSTMAN, guaranteeing reliability and efficiency.
- Employed Git and Github to provide cross-team code management and version control.
- Implemented responsive design principles using the React library and CSS frameworks like Bootstrap, resulting in visually appealing and user-friendly interfaces.
- Conducted code reviews to ensure adherence to coding standards, best practices and maintainability.
- Identified and resolved back-end issues through systematic troubleshooting and debugging techniques.
- Worked in an Agile/Scrum development environment, participating in daily stand-ups and sprint planning.

United States Marine Corps, Ground Support Technician   May 2018 - May 2023

- Supervised and delegated a team of 6 employees, successfully meeting daily, weekly, and monthly goals.
- Provided mentorship to 7 individuals on a weekly and monthly basis, addressing personal and career development goals.
- Efficiently managed strict deadlines and progress reports, ensuring operational effectiveness and compliance.
- Lead as project manager during CNAF inspection which resulted in a 98% success rate.
- Managed and maintained precise data records utilizing data processing systems.
